Relevant Experience

Full Stack Developer @ MTV – Assistência Técnica em Eletrónica
February – June 2021 // Amadora, Portugal

- Structured a database to store information about users and products for sale on an e-commerce website.
- Reinvented an old website with a modern and accessible design in order to improve the user experience.
- Repaired several devices from a simple operating system formatting to the replacement of broken components.

Projects

Portfolio

- Built to announce my projects, introduce myself and my show my ability to build a website and deploy it on my own.

Zoo Map

- Mobile application built with React Native that keeps track of the animals you have visited throughout your zoo tour.
